## **THE SIMPLICITY OF MAT DESIGN AND CUTTING**

We proudly introduce: GUNNAR MAT CREATOR «GMC» operating software. Unlimited creativity combined with GUNNAR's award winning, state-of-the-art features, and proven reliability in mat board cutting applications.

## PRODUCT OVERVIEW

GUNNAR MAT CREATOR is the latest mat cutting operating software developed by framers, for framers, in the award-winning line of Gunnar computerized mat cutters. This completely new user interface is more intuitive and efficient, empowering the operator to customize designs and improve work flow in any mat cutting application.

GUNNAR MAT CREATOR offers a modern tool kit to easily create and cut custom designs. Once a design is completed and saved, the operator can open and cut it automatically with one mouse click. GMC software is a complete tool for the entire mat cutting process - from a creative idea to a completed masterpiece.
